

Ali Rezaee

DevOps & Site Reliability Engineer

Bonn, Germany | +49 176 3125 6870 | alirezaeei01@gmail.com | linkedin.com/in/ali-rezaeei | github.com/Ali-Rezaeei

SUMMARY

DevOps and Site Reliability Engineer with 3+ years operating production infrastructure on Kubernetes, Azure, and HashiCorp stack. Cut error-resolution time by 20% through centralized observability and alerting, raised security posture 20% above industry peers, and built MCP servers that let AI agents work across the stack. M.Sc. Computer Science student at the University of Bonn; holds a valid German work permit for full-time employment.

SKILLS

Orchestration & IaC: Kubernetes, Docker, HashiCorp Nomad, Vault, Consul, Terraform, Ansible, Microservices

Cloud & Virtualization: Microsoft Azure, OpenStack, vCenter, ESXi

Observability & SRE: Prometheus, Grafana, Loki, OpenTelemetry, Promtail, Elastic Stack (ELK), InfluxDB, alerting, incident response

CI/CD & Programming: GitLab CI, GitHub Actions, Go, Python, Bash

Databases & Messaging: PostgreSQL, TSDB, InfluxDB, Kafka, RabbitMQ, gRPC

Security, Networking & OS: Microsoft Sentinel, Defender, Intune, pfSense, Nginx, Caddy, MQTT, ISO documentation, Linux system administration, Git

PROFESSIONAL EXPERIENCE

DevOps Engineer, Recogizer

08/2025 – Present | Bonn, Germany

AI-driven energy optimization for commercial buildings

- Built centralized monitoring and alerting with Prometheus and Grafana across Kubernetes, Nomad, and Azure, reverse proxies, and 7+ database engines, cutting error-resolution time by 20%.
- Developed the Nomad MCP server and deployed MCP servers for Grafana, GitLab, and the task-management platform, enabling developers to build AI agents that query infrastructure, the knowledge base, and tickets.
- Created an event-based Live Infrastructure Graph giving real-time visibility into service dependencies, powered by Graphify and triggered by an internal Go/Python deployment tool I built for Nomad.
- Automated infrastructure provisioning, database backups, and Nomad client rollout with Terraform and Ansible, improving reliability; scripted automation in Python, Bash, and Go, increasing operational efficiency by 50%.
- Deployed Microsoft Sentinel and optimized Defender and Intune, raising the security score 20% above comparable companies with same size; automated security workflows with Logic Apps and Power Automate.

DevOps Engineer, ParaTech Co

06/2024 – 05/2025 | Tehran, Iran

Software and infrastructure services company

- Set up code-level monitoring and alerting with OpenTelemetry, Prometheus, Loki, and Grafana across several international Kubernetes projects.
- Built CI/CD workflows with GitHub Actions and GitLab CI for automated Kubernetes deployments.
- Managed 300+ VMs across 15 enterprise servers with vCenter and ESXi; owned network and perimeter security with pfSense.

Software Engineer, System Group (Sepidar Cloud)

06/2023 – 01/2024 | Tehran, Iran

Iran's largest enterprise-software vendor

- Developed a cloud ERP platform used by 70,000+ accountants, using Go, gRPC, PostgreSQL, and microservices.
- Isolated each customer in a dedicated Kubernetes pod, ensuring consistent performance at scale.

DevOps Engineer, Hermes Capital

09/2022 – 05/2023 | Tehran, Iran

Financial trading and investment firm

- Built monitoring and alerting for 100+ microservices across systemd services on 4 enterprise servers, tracking trades, portfolio sizes, and financial-loss risk (24/7 uptime) with Prometheus, Grafana, and InfluxDB; deployed and monitored Kafka and RabbitMQ (AMQP) clusters and automated configuration with Ansible.

EDUCATION

M.Sc. Computer Science, University of Bonn

04/2025 – Present

GPA 2.3/4.0, 106/120 ECTS completed; thesis: machine-learning-based network traffic classification

B.Sc. Computer Engineering, Amirkabir University of Technology

09/2019 – 07/2024

Ranked #2 among Iranian universities; GPA 16.77/20; thesis: VM memory prediction (Go, Libvirt), 19.5/20

CERTIFICATIONS & LANGUAGES

Certifications: Google AI Agents (Google); Docker Mastery: Kubernetes + Swarm (Udemy); GitLab CI/CD (Udemy); Microsoft Azure: Zero to Hero (Udemy)

Languages: English – C1 | German – B1 (in progress) | Persian – Native
