PROFESSIONAL INTERESTS

◆ Cloud Computing ◆ Cybersecurity ◆ Network ◆ Software Engineering

WORK EXPERIENCE

DevOps Engineer, *ParaTech Co*

Jun. 2024 - May. 2025

- Set up code-level monitoring and alerting using OpenTelemetry, Prometheus, Loki, and Grafana in several international Kubernetes-based projects.
- Built CI/CD workflows with GitHub Actions and GitLab CI for Kubernetes deployments.
- Using Kubernetes for automating deployment, scaling, and management of containerized applications.
- Managed a cluster of over 300 VMs across 15 enterprise servers using vCenter and ESXi to deploy BigBlueButton; also responsible for network and perimeter security using pfSense.
- Skills: Kubernetes, Go, GitHub Actions, GitLab CI, Prometheus, Grafana, OpenTelemetry, pfSense, vCenter, ESXi, Ansible, Docker, Microservices.

Software Engineer, *System Group*

Jun. 2023 - Jan. 2024

- Software Engineer at Sepidar Cloud team in System Group, where I developed and maintained an ERP platform used by over 70,000 accountants across the country.
- Developed cloud-based administrative automation software.
- Utilized microservices and micro front-end architecture.
- Designed and implemented efficient, resource-friendly code, Ensuring optimal performance by providing each customer with a separate pod using Kubernetes.
- Skills: Go, PostgreSQL, gRPC, AngularJS, Gin, Microservices, Jasper Reports.

DevOps Engineer, *Hermes Capital*

Sep. 2022 - May. 2023

- Expanded monitoring capabilities to include Kafka and AMQP streams, time series databases (InfluxDB), and visualized metrics using Grafana.
- Implemented proactive monitoring and alerting with Prometheus, ensuring 24/7 system uptime and tracking trades, portfolio sizes, and financial risks.
- Containerized applications with Docker and automated infrastructure provisioning and configuration management with Ansible.
- Skills: Git, pfSense, Nginx, Kubernetes, vCenter, ESXi, Elastic Stack (ELK), Linux System Administration.

EDUCATION

University of Bonn

April 2025 - Present

Master of Science in Computer Science (Rank 227 among all Universities based on QS ranking)

Bonn, Germany

- Focused on the Information and Communication Technology.
- Currently taking coursework in:
 - ◆ Malware Analysis
 - ◆ Security of Distributed Systems
 - ◆ Practical Challenges in Security and Privacy
 - ◆ Artificial Life

Amirkabir University of Technology (Tehran Polytechnic)

Sep. 2019 – July. 2024

Bachelor of Science in Computer Engineering (Rank 403 among all Universities based on QS ranking)

Tehran, Iran

- Focused on Computer Networks and Software Engineering.
- GPA for: Last two years: 18.38/20 Total 141 units: 16.77/20
- Selected Coursework:
 - ◆ Signals and Systems (20/20)
 - ◆ Embedded and Real-Time Systems (19.7/20)
 - ◆ Applied Linear Algebra (19/20)
 - ◆ Software Testing (18.9/20)
 - ◆ Computer Architecture (18.52/20)
 - ◆ Operating Systems (17.55/20)
 - ◆ Software Engineering I (17.75/20)
 - ◆ Web Programming (20/20)
 - ◆ Principles of Cloud Computing (18.72/20)
 - ◆ Microprocessor and Assembly Language (20/20)
 - ◆ User Interface Design (20/20)
 - ◆ Information Security (17.4/20)
 - ◆ Algorithm Design (17.5/20)
 - ◆ Software Engineering II (17.56/20)

Nikan High School

2016 – 2019

Diploma in Physics and Mathematics Discipline, GPA: 18.84/20

Tehran, Iran

RESEARCH EXPERIENCE

Undergraduate Research Assistant, Amirkabir University of Technology, Tehran, Iran

Sep. 2023 - Jun. 2024

- Designed and implemented a system for memory prediction in virtual machines using Golang and Libvirt.
- Developed an agent to collect real-time data, make predictions, and visualize the results.
- Evaluated memory prediction methods using real workload scenarios on virtual machines, demonstrating significant improvements in resource efficiency and memory allocation.
- My B.Sc. thesis, supervised by [Prof. Seyyed Ahmad Javadi](#).
- A comprehensive report of the findings can be accessed here: [link](#)
- Grade of Project: 19.5/20

SKILLS

Technical Skills

- Programming Languages and HDLs: Golang, .Net, Python, Matlab, Java, Javascript, C, C++, VHDL, Verilog
- DevOps Tools: Linux, Kafka, Prometheus, Docker, Grafana, Kubernetes, Opentelemetry, Vcenter, ESXI, OpenStack, Ansible, pfsense, AMQP, Git, Jira, LATEX, Microsoft Word and Excel

Language Skills

- English: B2 (IELTS Academic: Overall 6.5) Issue Date: Jun. 2024
- German: A2 (in progress)

Personal Skills

- Detail-oriented, eager to learn and teach, strong research abilities, problem-solving
- Mountain guide and Rock climbing guide from mountain federation of Iran
- Life saving certification from swimming federation of Iran

TEACHING EXPERIENCE

Teaching Assistant, Amirkabir University of Technology

◆ Software Testing (Spring 2024)

◆ Cloud Computing (Spring 2023)

◆ Microprocessor and Assembly Language (Fall 2024)

◆ Software Engineering II (Fall 2023)

NOTABLE PROJECTS

Memory Harvesting System for Linux Operating System | [link](#)

- My thesis project which is designed to monitor and predict memory usage in Linux environments.

Os-Project-xv6-OS | [link](#)

- Operating System course project to make changes on the xv6 OS which is written by C.

Telegram | [link](#)

- Web Programming course project that developed a chatting application like Telegram.

Clash Royale | [link](#)

- Advanced Programming course project that developed a real game and programmed by Java.

Url Shortener | [link](#)

- Cloud Computing course project that developed a url shortener and dockerize it to deploy by K8s.

Health System | [link](#)

- logical Circuit course project that developed a health system which is written by Verilog.

HONORS & AWARDS

- Ranked top 1% place among approximately 140,000 applicants in Mathematics and Physics Aug. 2019
- Qualified in second level of Olympiad for Computer high school Aug. 2018

VOLUNTEER & EXTRACURRICULAR ACTIVITIES

Student Scientific Chapter, Computer Engineering Department, Amirkabir University of Technology 2019 - 2024

- Member of Executive Committee of Amirkabir Linux Festival
- Member of Executive Committee of Amirkabir ACPC
- Member of Executive Committee of Amirkabir Artificial Intelligence Competitions
- Member of Executive Committee of Amirkabir Artificial Intelligence Student Summit

Students' Mountain Group, Amirkabir University of Technology 2020 - 2024

- Technical Assistant in university mountain group responsible for all aspects of planning and risk assessment of university's weekly climbing program
- Director of climbing program Lead a team of mountain climbers, planning all parts of the climb from start to finish.
- I have led multiple expeditions to the summit of Mount Damavand, the highest peak in Iran, standing at 5,600 meters.
